STATUS LETTER

Sir:

We have not yet received an Official Action in the above-identified patent application. Please advise us of the status of this patent application.

The purpose of this inquiry is to make certain that, if an Official Action has been sent, but not yet received by the undersigned attorney, we can obtain a copy of any such action and respond to it in a timely fashion.

Respectfully submitted,

**Part II SUMMARY OF ACTION**

1. ☒ Claims 1-49 are pending in the application.

Of the above, claims \_\_\_\_\_ are withdrawn from consideration.

2. ☐ Claims \_\_\_\_\_ have been cancelled.
3. ☐ Claims \_\_\_\_\_ are allowed.
4. ☒ Claims 1-10, 13, 14, 16-28, 34-37, 41, 42, 46, 48 & 49 are rejected.
5. ☒ Claims 11, 12, 15, 29-33, 38-40, 43-45 & 47 are objected to.
6. ☐ Claims \_\_\_\_\_ are subject to restriction or election requirement.

7. ☒ This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.

8. ☐ Formal drawings are required in response to this Office action.

9. ☐ The corrected or substitute drawings have been received on \_\_\_\_\_. Under 37 C.F.R. 1.84 these drawings are ☐ acceptable ☐ not acceptable (see explanation or Notice re Patent Drawing, PTO-848).

10. ☐ The proposed additional or substitute sheet(s) of drawings, filed on \_\_\_\_\_, has (have) been ☐ approved by the examiner ☐ disapproved by the examiner (see explanation).

11. ☐ The proposed drawing correction, filed on \_\_\_\_\_, has been ☐ approved ☐ disapproved (see explanation).

12. ☐ Acknowledgment is made of the claim for priority under U.S.C. 119. The certified copy has ☐ been received ☐ not been received ☐ been filed in parent application, serial no. \_\_\_\_\_; filed on \_\_\_\_\_.

13. ☐ Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.

14. ☐ Other

**EXAMINER'S ACTION**

Serial No. 312,111

-2-

Art Unit 311

1. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

2. Claims 23, 24, 36, 46 and 48 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves.

Groves teaches a article vending machine comprising: a housing 20; display means (unnumbered) for display of the types of articles available; means 50 for receiving and accepting a means of monetary exchange; and means for dispensing the articles in a number corresponding to the amount of money input to the machine. Further, the arrays of articles in Groves comprise a web of articles separated at intervals by lines of perforations and that such articles may be a variety of articles.

Groves fails to teach the articles being lottery tickets and providing the machine with a message display advertising the articles.

Serial No. 312,111

-3-

Art Unit 311

The specific articles being lottery tickets in considered an obvious matter of choice and the provision of advertising displays on a vending machine is notoriously well known in the art.

3. Claims 1-8, 10, 13, 14, 16-18, 22, 25-28, 37, 41, 42 and 49 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves as applied to claims 23, 24, 36, 46 and 48 above, and further in view of Knee '935.

Groves fails to teach the display means being windows past which the articles are transported to be viewed while dispensing. Groves further fails to teach separating means for separating the articles from one another.

Knee '935 teaches display means comprising a window allowing for viewing of the articles and their movement for dispensing. Knee '935 also teaches providing separating means comprising bursting means 51, 54, 65 to insure positive separation of articles from one another.

It would have been obvious to one of ordinary skill in the art to employ windows to view the articles as the display means in Groves and to provide separating means in Groves to insure positive separation of the articles from one another for dispensing.

4. Claims 9, 19 and 34 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to

Serial No. 312,111

-4-

Art Unit 311

claims 1-8, 10, 13, 14, 16-18, 22, 25-28, 37, 41, 42 and 49 above, and further in view of Awane et al.

Groves in view of Knee '935 fails to show the monetary exchange means selected from currency detector and a credit card reader and the specific means for receiving and accepting the monetary exchange means.

Awane et al teaches providing a vending machine with means for receiving and accepting currency having means to display the amount of credit due the customer and reducing the amount due the customer corresponding to the number of articles dispensed.

In view of the teachings of Awane et al, it would have been obvious to one having to one having ordinary skill in the art to provide the vending machine of Groves with means for receiving and accepting a monetary exchange means having display means to display the credit due a customer.

5. Claim 20 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1-8, 10, 13, 14, 16-18, 22, 25-28, 37, 41, 42 and 49 above, and further in view of O'Neil et al.

Groves in view of Knee '935 fails to teach providing a bar code on the articles and a bar code reader positioned to read the bar code as they are dispensed.

O'Neil et al teaches providing in a vending machine a bar code 102 on each article to be vended to provide information with

Serial No. 312,111

-5-

Art Unit 311

regard<sup>to</sup> the article and a bar coded reader positioned within the machine to read the bar code as the articles are vended.

It would have been obvious to one of ordinary skill in the art to provide the Groves vending machine with bar codes on the articles and bar code readers to provide information regarding the articles as they are dispensed.

6. Claims 21 and 35 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1-8, 10, 13, 14, 16-18, 22, 25-28, 37, 41, 42 and 49 above, and further in view of Cedrone et al.

Groves in view of Knee' 935 fails to teach providing a plurality of vending machines and communicating data regarding operation to a central location.

Cedrone et al teaches providing a group of vending machines and communicating data regarding operation of the machine to a central location.

It would have been obvious to one of ordinary skill in the art to provide plural machines of Groves-Knee '935 and communicate data regarding their operation to a central location in view of the teaching of Cedrone et al.

7. Claims 11, 12, 15, 29-33, 38-40, 43-45 and 47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Serial No. 312,111

-6-

Art Unit 311

7. Any inquiry concerning this communication should be directed to David Bollinger at telephone number (703) 308-1113.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Honorable Commissioner of Patents  
and Trademarks  
Washington, D.C. 20231

Sir:

The following prior art references are hereby called to  
the attention of the Examiner:

Fitzgerald, 2,865,699. Fitzgerald shows a manually-  
operated stamp vending machine which vends two different kinds of

stamps. The relevant portion of the disclosure is Figures 1 and 2 of the drawings and column 2, lines 10 through 43.

Webb, 2,657,750 shows a ticket storage and dispensing unit in which tickets are held against removal by manually-releasable "sprags". In particular, see Figure 3 of the drawings and column 2, lines 3 through 33 and column 4, line 64 through line 75; and column 5, lines 40 through 43.

Kostka et al, 4,140,259 shows a coin-operated vending machine in which the ticket is driven forward by a reciprocating mechanism which inserts a pin through a hole in the ticket strip to drive the ticket forward. The ticket is clamped and held by a mechanism shown near reference numeral 108 in Figure 2. In particular, see Figures 1, 2 and 6. and column 3, line 50 to column 4, line 61.

Arp et al., 3,935,978, shows a manually-operated ticket dispenser. The unit allows an agent to pull as many tickets as desired from the machine. A frictional mechanism shown in Figure 3 tends to hold the tickets in the machine. See, in particular Figures 2 and 5 and column 4, line 20 to column 5, line 10.

Wescoat, 4,094,451, shows a lottery ticket dispenser which bends the ticket in reverse directions prior to cutting the tickets free from the strip to dispense them. See, in particular, Figure 2 of the drawings and column 1, line 55 through column 2, line 24.

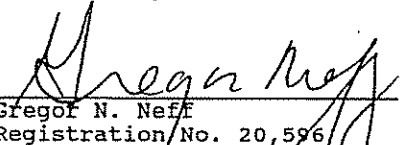

Horniak, 4,272,001, shows a ticket dispenser in which pulling on the tickets when the power to the dispensing unit is turned off causes the tickets to be gripped more firmly to hinder

them from being pulled out. In particular, see the abstract in Figure 3 of the drawings.

Herring, 4,157,670, shows a ticket vending device in which a ticket is bent over before being cut free from the remaining tickets by means of a cutting blade. In particular, see the abstract, Figure 2 of the drawings, and column 4, lines 30-68 and column 6, lines 5-27.

It is respectfully requested that the enclosed references be made of record in the above-identified patent application.

Respectfully submitted,

IN THE SPECIFICATION:

Page 1, line 6, after "Fulton", insert --now U.S.

Patent No. 4,982,337--;

Page 2, line 8, change "are" to --is--;

IN THE CLAIMS:

Rewrite Claims 1, 3, 6, 10, 11, 16, 23-25, 29, 32, 38, 41, 43, and 45-47 as follows:

1. (Amended) A ticket dispensing machine, comprising, in combination, a housing, at least one window in said housing through which tickets inside said housing can be seen but not touched by a person outside said housing, a dispensing outlet in said housing, [moving] electrically powered means for moving a continuous strip [an array] of tickets past said window, and [means] for dispensing through said outlet a pre-determined number of said tickets to an operator of said machine, and protective means for deterring the operator of the machine from withdrawing from said machine more than said pre-determined number of tickets.

3. (Amended) A machine as in Claim [5] 1 [in which said tickets are attached together in a continuous strip when they move past said window, and] including separating means for separating said tickets from one another before they are dispensed.

5. (Amended). A machine as in Claim 1 in which said [tickets are instant winner lottery tickets.] dispensing outlet

a4  
is accessible to an operator in a position to see the tickets behind said window.

10. (Amended) A machine as in Claim 1 in which said [dispensing] ~~protective~~ <sup>dispensing</sup> means includes means for barring a person from grasping any ticket before it is dispensed through said outlet.

11. (Amended) [A machine as in Claim 1] A ticket dispensing machine, comprising, in combination, a housing, at least one window in said housing through which tickets inside said housing can be seen but not touched by a person outside said housing, a dispensing outlet in said housing, moving means for moving an array of tickets past said window, and means for dispensing through said outlet a pre-determined number of tickets to an operator of said machine including bar-code reading means mounted adjacent the path of travel by said tickets for reading a bar code from said tickets and transmitting to central computer means the information so read.

16. (Amended) A ticket vending method, said method comprising the steps of:

(a) utilizing electrically powered drive means for moving [an array] a strip of mutually-attached tickets past a viewing window in a housing in a manner such that the tickets can be seen from outside said housing, and

(b) issuing from said housing [the] a pre-determined number of tickets from said array which are ordered by an

ab operator, and operating means for deterring said operator from withdrawing more than said number of tickets.

23. (Amended) A lottery ticket vending machine comprising, in combination, a housing display means comprising at least one window in a wall of said housing for displaying an array of lottery ticket representations viewable from outside of said housing by a customer, said array representing tickets in said machine available for purchase, acceptor means for receiving and accepting a means of monetary exchange, [and] means for dispensing said tickets in a number corresponding to the amount of money input into said machine by said customer while moving said array past said window, and limiting means for limiting the number of tickets said customer receives from said machine to said number.

24. (Amended) A machine as in Claim 23 in which said display means comprises a plurality of windows, each being [is] adapted for displaying one of a plurality of arrays of said tickets, and [including] includes means for selecting from among said arrays one array from which tickets are dispensed.

25. (Amended) A machine as in Claim 23 in which [said display means comprises at least one transparent enclosure through which said array can be seen but not touched by said customer, and means for moving said array in said enclosure during the dispensing of said tickets.] said dispensing means includes a dispensing outlet in said one wall of said housing.

1329. (Amended) [A machine as in Claim 26] A lottery ticket vending machine comprising, in combination, a housing, display means for displaying an array of lottery ticket representations viewable from outside of said housing by a customer, said array representing tickets in said machine available for purchase, acceptor means for receiving and accepting a means of monetary exchange, and means for dispensing said tickets in a number corresponding to the amount of money input into said machine by said customer, in which said display means comprises at least one transparent window through which said array can be seen but not touched by said customer, and means for moving said array in said enclosure during the dispensing of said tickets, said tickets being formed in a continuous strip with individual tickets delineated from their neighbors by perforations, storage means in said housing for storing a supply of said tickets, feed means for feeding said strip past said window, separator means for receiving said strip, and after passing by said window and separating said tickets from one another, said dispensing means being adapted to dispense one or more tickets separated from said strip including sliding support means for mounting said storage, feed, separator and dispensing means in said housing, said housing having a removable panel and said support means being slidable out of said housing for ease of reloading and service.

1732. (Amended) [A machine as in Claim 25] A lottery ticket vending machine comprising, in combination, a housing,

29  
display means for displaying an array of lottery ticket  
representations viewable from outside of said housing by a  
customer, <sup>said</sup> ~~say~~ array representing tickets in said machine  
available for purchase, acceptor means for receiving and  
accepting a means of monetary exchange, and means for dispensing  
said tickets in a number corresponding to the amount of money  
input into said machine by said customer, in which said display  
means comprises at least one transparent enclosure through which  
said array can be seen but not touched by said customer, and  
means for moving said array in said enclosure during the  
dispensing of said tickets, including a lamp for illuminating  
said array.

18 38. (Amended) [A machine as in Claim 23] A lottery  
 410  
ticket vending machine comprising, in combination, a housing,  
display means for displaying an array of lottery ticket  
representations viewable from outside of said housing by a  
customer, say array representing tickets in said machine  
available for purchase, acceptor means for receiving and  
accepting a means of monetary exchange, and means for dispensing  
said tickets in a number corresponding to the amount of money  
input into said machine by said customer, in which said display  
means comprises video display means for displaying a plurality of  
arrays of ticket images on a video screen.

41. (Amended) A ticket dispensing machine, said  
 41  
 machine comprising, in combination, housing, at least one window  
 in said housing through which tickets inside said housing can be

911  
~~seen but not touched by a person outside said housing, a~~  
 dispensing outlet in said housing, moving means for moving an  
 array of tickets past said window, means for dispensing through  
 said outlet a pre-determined number of tickets to an operator of  
 said machine, said tickets being formed in a continuous strip  
 with individual tickets delineated from their neighbors by  
 perforations, storage means in said housing for storing a supply  
 of said tickets, separator means for receiving said strip after  
 passing by said window and separating said tickets from one  
 another, said dispensing means being adapted to dispense one or  
 more tickets separated from said strip[.], said housing having a  
restricted outlet opening, said outlet opening being positioned  
so that a ticket does not emerge therefrom until after it has  
been separated from said strip, whereby the strip of tickets is  
not easy to each and pull out of the machine, including a ticket  
receptacle adjacent said outlet opening, said receptacle having  
bifurcated means for holding a dispensing ticket, with a space  
for the insertion of fingers to easily grasp the tickets.

912  
 21 43. (Amended) [A machine as in Claim 41] A ticket  
dispensing machine, said machine comprising, in combination, a  
housing, at least one window in said housing through which  
tickets inside said housing can be seen but not touched by a  
person outside said housing, a dispensing outlet in said housing,  
moving means for moving an array of tickets past said window,  
means for dispensing through said outlet a pre-determined number  
of tickets to an operator of said machine, said tickets being

C-12  
 1  
 2  
 11  
formed in a continuous strip with individual tickets delineated from their neighbors by perforations, storage means in said housing for storing a supply of said tickets, separator means for receiving said strip after passing by said window and separating said tickets from one another, said dispensing means being adapted to dispense one or more tickets separated from said strip, including sliding support means for mounting said storage, feed, separator and dispensing means in said housing, said housing having a removable panel and said support means being slidable out of said housing for ease of reloading and service.

23 48. (Amended). [A machine as in Claim 41] A ticket dispensing machine, said machine comprising, in combination, housing, at least one window in said housing through which tickets inside said housing can be seen but not touched by a person outside said housing, a dispensing outlet in said housing, moving means for moving an array of tickets past said window, means for dispensing through said outlet a pre-determined number of tickets to an operator of said machine, said tickets being formed in a continuous strip with individual tickets delineated from their neighbors by perforations, storage means in said housing for storing a supply of said tickets, separator means for receiving said strip after passing by said window and separating said tickets from one another, said dispensing means being adapted to dispense one or more tickets separated from said strip, said housing having a front panel, said window comprising a bezel in said front panel, a transparent covering for the front

of said bezel, and the back of said bezel being open, and guide means for guiding said strip along said back of said bezel.

46. ~~(Amended) A method of dispensing tickets from a machine said method comprising the steps of:~~

- ~~(a) displaying a plurality of arrays of ticket representations, each being visible through a window in said machine, each of said arrays representing tickets available for dispensing from said machine,~~
- ~~(b) selecting tickets from one of said arrays,~~
- ~~(c) dispensing a selected number of said tickets,~~
- ~~[and] while preventing the remaining tickets from being withdrawn from said machine; and~~
- ~~(d) causing the selected array to move to past said window to indicate the dispensing of tickets therefrom.~~

24. (Amended). [A method as in Claim 46] A method of dispensing tickets from a machine said method comprising the steps of:

- (a) displaying a plurality of arrays of ticket representations, each of said arrays representing tickets available for dispensing from said machine,
- (b) selecting tickets from one of said arrays,
- (c) dispensing a selected number of said tickets, and
- (d) causing the selected array to move to indicate the dispensing of tickets therefrom[.] in which said ticket representations comprise video images of said tickets displayed on a video screen.

REMARKS

The specification has been amended to insert the number of the patent granted on the patent application mentioned on pages 1 and 10 of the application, and to correct certain other minor errors. The claims have been amended to place them in better form for allowance.

Before proceeding with the discussion of the patentability of the claims, applicant would like to take this opportunity to call to the Examiner's attention certain prior art references. A copy of each reference and a form PTO 1449 is enclosed listing each of the references.

The first of the enclosed references is the U.S. Patent No. 4,982,337 which is mentioned in the specification on pages 1 and 10. This patent has the relevance mentioned in the specification on pages 1 and 10.

Other references are Schafer 4,858,806; Tigner 4,738,384; and a copy of page 10 of "Public Gaming International" magazine of November, 1988 showing ticket dispensers sold by a company called "Take-A-Ticket-Inc." of Albany, Oregon. It is believed that the dispensers shown in the latter advertisement are similar to those shown in the enclosed Tigner patent 4,738,384.

Each of the above three references shows a instant winner lottery ticket dispenser which is intended to be attended by an agent. Each is designed to dispense tickets from the rear of the unit while the customer faces the unit from the opposite

end. For example, as it is shown in Fig. 6 of the Schafer reference, tickets are issued from slots at 56 and 58 in the rear of the dispensing unit, whereas the customer would view the tickets through the window on the opposite side of the unit.

The devices shown in the three last-named references are not suitable for use as unattended ticket vending devices. They significantly differ from the present invention, in that, if the dispenser device is not attended, a customer would be free to withdraw as many tickets as he or she desired without paying for them.

Applicant's invention provides a stand-alone ticket vending machine in which the customer is deterred from withdrawing more tickets than he or she has paid for.

In particular, the present invention provides a stand-alone unattended ticket vending machine in which a representations of the tickets move past a window during dispensing so that the customer can see the tickets moving while they are being dispensed. This adds interest and excitement, and increases ticket sales. Moreover, the customer can see the tickets themselves clearly before purchase and read relevant information from the tickets themselves, such as the amount to be won (for lottery tickets, etc.), the conditions of the game being played, the cost of each ticket, etc.

Preferably, the tickets are also issued from the same side of the machine as the one in front of which the customer stands, as it is recited in some of the claims below.

In a preferred embodiment of the invention, multiple windows are provided in a single unit, and a plurality of different tickets for different lottery games is provided. The customer has a choice of different games he or she can play, thus adding further interest and excitement to the playing process, and further increasing ticket sales.

In the sale of tickets, the movement of the tickets past the window has a special, synergistic effect in that it arouses the interest and purchasing proclivity of the customer, and also gives assurance of the reliable dispensing of lottery tickets.

The Examiner has indicated that claims 11, 12, 29 through 33, 38 through 40, 43 through 45 and 47 would be allowable if rewritten in independent form. Those claims have now been rewritten in independent form, incorporating the limitations of all the preceding claims, in the manner requested by the Examiner, and are therefore believed to be allowable. Their allowance is respectfully requested.

The rejection of claims 23, 24, 36, 46 and 48 as being unpatentable over Groves is respectfully traversed. Each of those claims now calls for a window through which the tickets are displayed and past which the tickets are moved. Therefore, for the reasons given above, and those to be given below, these claims are allowable.

The rejection of claims 1 through 8, 10, 13, 14, 16 - 18, 22, 25 - 28, 37, 41, 42 and 49 over Groves in view of Knee is respectfully traversed.

These claims not only call for a ticket dispensing machine and, in some claims, a lottery ticket vending machine, with one or more windows, but they also recite the provision of means or a method step to deter the operator from withdrawing from the machine more tickets than he or she has paid for. This is a necessary feature for stand-alone vending machines which is not found in the ticket vending machines of the cited prior art.

Grove does not show a ticket vending machine. Grove merely shows a machine for dispensing a variety of bulky articles from a strip of packages attached together in a string. The solutions to problems in vending bulky articles such as those are not the same as those in dispensing tickets, and particularly, lottery tickets.

Tickets, and particularly lottery tickets, are smooth, flat and sometimes slippery and difficult to feed or to hold against unauthorized withdrawal. These problems are not found with separate packages of bulk goods such as cigarettes, nails, etc. Such items are relatively easy to hold in the machine to prevent them from being withdrawn without proper payment. Such is not the case for tickets. Unless precautions are taken, a customer can simply grasp the end of a ticket string, pull on it and withdraw far more tickets than he or she has paid for.

The Knee reference merely shows a hand-operated peanut dispensing machine. As far as can be seen it is not a vending machine, in that it has no money receiving capabilities. Moreover, it is not electrically powered and a large crank handle must be operated once for every item dispensed. This creates complexities which would make the machine very expensive to build today. Furthermore, the machine would be subject to great wear and tear, and to the destructive capabilities of disgruntled customers. The Knee machine also would be very slow in operation, thus eliminating one of the desired advantages of the ticket vending machine, namely, high-speed dispensing.

Moreover, since the string of peanut bags is not motor-driven, one gets no fascination from the movement of a stream of items past the window similar to that which one gets when viewing tickets such as lottery tickets moving past a window under the force of an automatic electric-powered driving mechanism.

In short, neither of the references here under discussion deals with the problems dealt with by the present invention and neither provides the unique solution to those problems.

The rejection of claims 9, 19 and 34 as being unpatentable over Groves in view of Knee and further in view of Awane also is respectfully traversed. These claims are dependent from and allowable with the claims from which they depend. The concept of providing monetary means of exchange receiving equipment is not, by itself, new. However, in combination with

the other features of the invention as claimed in the parent claims discussed above, these claims are patentable.

The rejection of Claim 20 as being unpatentable over Groves, Knee and O'Neil also is respectfully traversed. Claim 20 depends from Claim 16, which has been amended in the manner indicated above. Inclusion on the tickets of bar-coded information selected from the specific groups of information specified in Claim 20 certainly is not anticipated or suggested by O'Neil. This information is specific to the ticket vending system and method under discussion, and is not suggested by any one reference or a combination of those references.

Rejections of Claims 21 and 35 over Groves, Knee and Cedrone also is respectfully traversed. The Cedrone reference is directed to a problem which is different from that of the present invention. Cedrone does not teach the method and system recited in Claims 21 and 35 in that Cedrone does not relate to ticket vending machines and does not relate to the specific problems found in ticket vending machines and methods. For example, Claim 21 recites the step of providing a plurality of ticket vending machines in a particular location and selecting one of the machines to be a master and the other to be slaves and communicating data regarding the operation of the master and slave units through the master unit. As applied to ticket vending machines, this saves considerably on the cost of alternate communications systems, avoids the necessity for manual

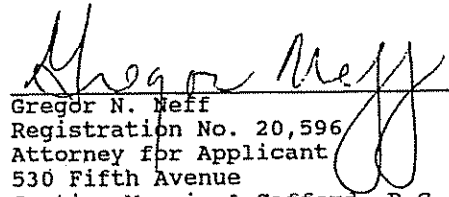

servicing at frequent intervals, and provides major maintenance cost advantages.

Apparatus Claim 35 has the same advantages and is patentable over the references for the same reasons as Claim 21.

In view of the foregoing, the claims have been distinguished from the cited references and are believed to be allowable.

Therefore, it is respectfully requested that the application be allowed and passed to issue.

Respectfully submitted,

## Part II SUMMARY OF ACTION

1. ☒ Claims 1-49 are pending in the application.  
Of the above, claims \_\_\_\_\_ are withdrawn from consideration.
2. ☐ Claims \_\_\_\_\_ have been cancelled.
3. ☒ Claims 11, 12, 29-32, 38-45 and 47 are allowed.
4. ☒ Claims 1-10, 13, 14, 16-28, 34-37, 46, 48 and 49 are rejected.
5. ☒ Claims 15 and 33 are objected to.
6. ☐ Claims \_\_\_\_\_ are subject to restriction or election requirement.
7. ☐ This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.
8. ☐ Formal drawings are required in response to this Office action.
9. ☒ The corrected or substitute drawings have been received on 26 Aug. 1991. Under 37 C.F.R. 1.84 these drawings are ☐ acceptable; ☒ not acceptable (see explanation or Notice re Patent Drawing, PTO-948).
10. ☐ The proposed additional or substitute sheet(s) of drawings, filed on \_\_\_\_\_, has (have) been ☐ approved by the examiner; ☐ disapproved by the examiner (see explanation).
11. ☐ The proposed drawing correction, filed \_\_\_\_\_, has been ☐ approved; ☐ disapproved (see explanation).
12. ☐ Acknowledgement is made of the claim for priority under U.S.C. 119. The certified copy has ☐ been received ☐ not been received  
☐ been filed in parent application, serial no. \_\_\_\_\_; filed on \_\_\_\_\_.
13. ☐ Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.
14. ☐ Other

## EXAMINER'S ACTION

Serial No. 312111

-2-

Art Unit 311

1. Claims 1-10 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 lines 5-8, it is not clearly understood whether there is a single means for moving the strip of tickets and dispensing them or if there are means for moving the strip and means for dispensing the tickets. It would appear to be more accurate and clear to recite separate means for these functions since that is what is disclosed.

2. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out

Serial No. 312111

-3-

Art Unit 311

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103.

4. Claims 23-28, 36, 37, 46 and 48 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves.

Groves teaches a article vending machine comprising: a housing 20; display means (unnumbered) for display of the types of articles available; means 50 for receiving and accepting a means of monetary exchange; and means for dispensing the articles in a number corresponding to the amount of money input to the machine. Further, the arrays of articles in Groves comprise a web of articles separated at intervals by lines of perforations and that such articles may be a variety of articles.

Groves fails to teach the articles being lottery tickets and providing the machine with a message display advertising the articles.

The specific articles being lottery tickets in considered an obvious matter of choice and the provision of advertising displays on a vending machine is notoriously well known in the art.

5. Claims 1-8, 10, 13, 14, 16-18, 22 and 49 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves as applied to claims 23-28, 36, 37, 46 and 48 above, and further in view of Knee '935.

Groves fails to teach the display means being windows past

Serial No. 312111

-4-

Art Unit 311

which the articles are transported to be viewed while dispensing. Groves further fails to teach separating means for separating the articles from one another.

Knee '935 teaches display means comprising a window allowing for viewing of the articles and their movement for dispensing. Knee '935 also teaches providing separating means comprising bursting means 51, 54, 65 to insure positive separation of articles from one another.

It would have been obvious to one of ordinary skill in the art to employ windows to view the articles as the display means in Groves and to provide separating means in Groves to insure positive separation of the articles from one another for dispensing.

6. Claims 9 and 19 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1-8, 10, 13, 14, 16-18, 22 and 49 above, and further in view of Awane et al.

Groves in view of Knee '935 fails to show the monetary exchange means selected from currency detector and a credit card reader and the specific means for receiving and accepting the monetary exchange means.

Awane et al teaches providing a vending machine with means for receiving and accepting currency having means to display the amount of credit due the customer and reducing the amount due the

Serial No. 312111

-5-

Art Unit 311

customer corresponding to the number of articles dispensed.

In view of the teachings of Awane et al, it would have been obvious to one having to one having ordinary skill in the art to provide the vending machine of Groves with means for receiving and accepting a monetary exchange means having display means to display the credit due a customer.

7. Claim 20 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1-8, 10, 13, 14, 16-18, 22 and 49 above, and further in view of O'Neil et al.

Groves in view of Knee '935 fails to teach providing a bar code on the articles and a bar code reader positioned to read the bar code as they are dispensed.

O'Neil et al teaches providing in a vending machine a bar code 102 on each article to be vended to provide information with regard to the article and a bar coded reader positioned within the machine to read the bar code as the articles are vended.

It would have been obvious to one of ordinary skill in the art to provide the Groves vending machine with bar codes on the articles and bar code readers to provide information regarding the articles as they are dispensed.

8. Claim 21 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1-8, 10, 13, 14, 16-18, 22 and 49 above, and further in

Serial No. 312111

-6-

Art Unit 311

view of Cedrone et al.

Groves in view of Knee '935 fails to teach providing a plurality of vending machines and communicating data regarding operation to a central location.

Cedrone et al teaches providing a group of vending machines and communicating data regarding operation of the machine to a central location.

It would have been obvious to one of ordinary skill in the art to provide plural machines of Groves-Knee '935 and communicate data regarding their operation to a central location in view of the teaching of Cedrone et al.

9. Claim 34 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves as applied to claims 23-28, 36, 37, 46 and 48 above, and further in view of Awane et al.

Awane et al as applied above in paragraph 8.

10. Claim 35 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves as applied to claims 23-28, 36, 37, 46 and 48 above, and further in view of Cedrone et al.

Cedrone et al as applied above in paragraph 8.

11. Claims 15 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Claims 11, 12, 29-32, 38-45 and 47 are allowable over the

Serial No. 312111

-7-

Art Unit 311

prior art of record.

13. Applicant's arguments filed 27 June 1991 have been fully considered but they are not deemed to be persuasive.

14. Applicant's amendment necessitated the new grounds of rejection. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

15. Any inquiry concerning this communication should be directed to David Bollinger at telephone number (703) 308-1113.

**NOTICE OF ABANDONMENT**

This application is abandoned in view of:

1. ☐ Applicant's failure to respond to the Office letter, mailed \_\_\_\_\_.
2. ☒ Applicant's letter of express abandonment which is in compliance with 37 C.F.R. 1.138, *as per FWC*.
3. ☐ Applicant's failure to timely file the response received \_\_\_\_\_ within the period set in the Office letter.
4. ☐ Applicant's failure to pay the required issue fee within the statutory period of 3 months from the mailing date of \_\_\_\_\_ of the Notice of Allowance.
  - ☐ The issue fee was received on \_\_\_\_\_.
  - ☐ The issue fee has not been received in Allowed Files Branch as of \_\_\_\_\_.

In accordance with 35 U.S.C. 151, and under the provisions of 37 C.F.R. 1.316(b), applicant(s) may petition the Commissioner to accept the delayed payment of the issue fee if the delay in payment was unavoidable. The petition must be accompanied by the issue fee, unless it has been previously submitted, in the amount specified by 37 C.F.R. 1.17 (l), and a verified showing as to the causes of the delay.

If applicant(s) never received the Notice of Allowance, a petition for a new Notice of Allowance and withdrawal of the holding of abandonment may be appropriate in view of *Delgar Inc. v. Schuyler*, 172 U.S.P.Q. 513.
5. ☐ Applicant's failure to timely correct the drawings and/or submit new or substitute formal drawings by \_\_\_\_\_ as required in the last Office action.
  - ☐ The corrected and/or substitute drawings were received on \_\_\_\_\_.
6. ☐ The reason(s) below.

Washington, D.C. 20231

This is a Request for filing a ☐ continuation-in-part ☒ continuation ☐ divisional application under 37 CFR 1.62 of prior application Serial No. 07/312/111, filed on 2/17/89, currently entitled Ticket Dispenser Machine and Method by the following named inventor(s):

FULL NAME OF INVENTOR	FAMILY NAME	FIRST GIVEN NAME	SECOND GIVEN NAME
	Burr	Robert	
RESIDENCE & CITIZENSHIP	CITY	STATE OR FOREIGN COUNTRY	COUNTRY OF CITIZENSHIP
	San Diego	California	USA
CURRENT CORRESPONDENCE ADDRESS	POST OFFICE ADDRESS	CITY	STATE & ZIP CODE/COUNTRY
	7372 Convo Court	San Diego	California 92111
FULL NAME OF INVENTOR	FAMILY NAME	FIRST GIVEN NAME	SECOND GIVEN NAME
RESIDENCE & CITIZENSHIP	CITY	STATE OR FOREIGN COUNTRY	COUNTRY OF CITIZENSHIP
CURRENT CORRESPONDENCE ADDRESS	POST OFFICE ADDRESS	CITY	STATE & ZIP CODE/COUNTRY
FULL NAME OF INVENTOR	FAMILY NAME	FIRST GIVEN NAME	SECOND GIVEN NAME
RESIDENCE & CITIZENSHIP	CITY	STATE OR FOREIGN COUNTRY	COUNTRY OF CITIZENSHIP
CURRENT CORRESPONDENCE ADDRESS	POST OFFICE ADDRESS	CITY	STATE & ZIP CODE/COUNTRY

☐ See attached sheet for names and addresses of additional inventors (if any).

The above identified prior application in which no payment of the issue fee, abandonment of, or termination of proceedings has occurred, is hereby expressly abandoned as of the filing date of this new application. Please use all the contents of the prior application file wrapper, including all previously entered amendments and the drawings, as the basic papers for the new application.

Note: If prior application is not to be abandoned, then the form for 37 CFR 1.60 should be used.

- ☐ Enter the amendment previously filed on \_\_\_\_\_ under 37 CFR 1.116 but unentered, in the prior application.
- ☒ A preliminary amendment is enclosed.

The filing fee is calculated on the basis of the claims existing in the prior application as amended at 1 and 2 above.

(1) FOR	(2) NUMBER FILED	(3) NUMBER EXTRA	(4) RATE	(5) CALCULATIONS
TOTAL CLAIMS	24 -20-	4	20.00 X \$42.00 -	\$ 80.00
INDEPENDENT CLAIMS	7 -3-	4	X \$34.00 -	288.00
MULTIPLE DEPENDENT CLAIM(S) (if applicable)			+ \$110.00 -	
			BASIC FEE	+ 690.00
			Total of above Calculations -	1,058.00
Reduction by 1/2 for filing by small entity (Note: 37 CFR 1.9, 1.27, 1.28). If applicable, verified statement must be attached or already be on file in prior application.			-	529.00
			TOTAL FILING FEE -	529.00

CURTIS, MORRIS &amp; SAFFORD, P.C.

File No. 3390-2030

3. ☒ The Commissioner is hereby authorized to charge fees under 37 CFR 1.16 (for filing) and 1.17 (for prosecution) not otherwise paid which may be required with respect to the papers filed herewith, ☐ and also any additional such fees which may be required during the entire pendency of this application, ☐ and also the issue fee under 37 CFR 1.18), or credit any overpayment, to Deposit Account No. 03-3925.

4a. ☐ A check in the amount of \$ 405.00 is enclosed.

b. ☐ The filing fee to be paid later with surcharge [pursuant to 37 CFR 1.62(d)].

5. ☐ Since this application is a continuation-in-part which discloses and claims additional matter, a new oath or declaration ☐ is included ☐ will be filed later with surcharge [pursuant to 37 CFR 1.62 (d)].

6. ☐ Amend the specification by inserting before the first line the sentence:

B/ DHb 142/92 This application is a ☐ continuation-in-part, ☒ continuation, ☐ division, of application Serial No. 07/312,111, filed 2/17/89, now abandoned

[Note: If priority under 35 U.S.C. 120 involves a series of respectively copending applications, then in this amendment identify each and its relationship to its immediate predecessor.]

7a. ☐ A verified statement claiming small entity status is enclosed.

b. ☒ A verified statement claiming small entity status was filed in the prior application, Serial No. 07/312,111 Filed 2/15/89 and is still proper. [Note: Such a statement may be filed within two months with a request for refund of overpayment.]

8a. ☐ Priority of foreign Application No(s). \_\_\_\_\_ filed on \_\_\_\_\_ in \_\_\_\_\_, respectively, is claimed under 35 U.S.C. 119.

b. ☐ A certified copy of said foreign priority application(s) was filed in prior U.S. application Serial No. \_\_\_\_\_ filed \_\_\_\_\_. Acknowledgement thereof is requested.

9. ☒ The prior application is assigned of record to The Ralph L. Evans Trust

10. ☒ The power of attorney in the prior application is to: ☒ CURTIS, MORRIS & SAFFORD, P.C. (Reg. No. 12761), and Gregor N. Neff, Esq. 20,596

11. ☐ Original title and original applicant(s) of prior U.S. application, if different from above:

12. ☒ Applicant(s) hereby petition for an extension of time in the parent application (identified in paragraph 6 above) as may be needed for the latter to be copending with this application.  
☐ A separate confirmatory petition paper with required fee is filed herewith for independent processing and separate entry in the parent application file.

Address all future communications to: (May only be completed by applicant, or attorney, or agent of record.)

Attention of: Gregor N. Neff, Esq.  
c/o CURTIS, MORRIS & SAFFORD, P.C.  
530 Fifth Avenue  
New York, New York 10036

It is understood that secrecy under 35 U.S.C. 122 is hereby waived to the extent that if information or access is available to any one of the applications in the file wrapper of a 37 CFR 1.62 application, be it either this application or a prior application in the same file wrapper, the Patent and Trademark Office may provide similar information or access to all the other applications in the same file wrapper.

| 5. <input type="checkbox"/> Information on How to Effect Drawing Changes, PTO-1474. | 6. <input type="checkbox"/> _____  |

**Part II SUMMARY OF ACTION**

1. ☒ Claims 1, 2, 4-6, 10-12, 16, 18, 21, 22, 29-33, 38-40, 43-45 & 47 are pending in the application.

Of the above, claims \_\_\_\_\_ are withdrawn from consideration.

2. ☒ Claims 3, 7-9, 13-15, 17, 19, 20, 23-28, 34-37, 41, 42, 46, 48 & 49 have been cancelled.

3. ☒ Claims 11, 12, 29, 30, 32, 38-40, 43-45 & 47 are allowed.

4. ☒ Claims 1, 2, 4-6, 10, 16, 18, 21, 22, 31, 33 are rejected.

5. ☐ Claims \_\_\_\_\_ are objected to.

6. ☐ Claims \_\_\_\_\_ are subject to restriction or election requirement.

7. ☒ This application has been filed with Informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.

8. ☐ Formal drawings are required in response to this Office action.

9. ☐ The corrected or substitute drawings have been received on \_\_\_\_\_. Under 37 C.F.R. 1.84 these drawings are ☐ acceptable. ☐ not acceptable (see explanation or Notice re Patent Drawing, PTO-948).

10. ☐ The proposed additional or substitute sheet(s) of drawings, filed on \_\_\_\_\_ has (have) been ☐ approved by the examiner. ☐ disapproved by the examiner (see explanation).

11. ☐ The proposed drawing correction, filed on \_\_\_\_\_, has been ☐ approved. ☐ disapproved (see explanation).

12. ☐ Acknowledgment is made of the claim for priority under U.S.C. 119. The certified copy has ☐ been received ☐ not been received  
☐ been filed in parent application, serial no. \_\_\_\_\_; filed on \_\_\_\_\_

13. ☐ Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.

14. ☐ Other

EXAMINER'S ACTION

Serial No. 912005

-2-

Art Unit 311

1. Claims 1, 2, 4-6, 31 and 33 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 lines 5-8, it is not clearly understood whether there is a single means for moving the strip of tickets and dispensing them or if there are means for moving the strip and means for dispensing the tickets. It would appear to be more accurate and clear to recite separate means for these functions since that is what is disclosed. Claims 31 and 33 are indefinite because they depend from cancelled claim 26.

2. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Serial No. 912005

-3-

Art Unit 311

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103.

4. Claims 1, 2, 4-6, 10, 16, 18 and 22 are rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of <sup>f</sup>Knee '935.

Groves teaches a article vending machine comprising: a housing 20; display means (unnumbered) for display of the types of articles available; means 50 for receiving and accepting a means of monetary exchange; and means for dispensing the articles in a number corresponding to the amount of money input to the machine. Further, the arrays of articles in Groves comprise a web of articles separated at intervals by lines of perforations and that such articles may be a variety of articles.

Groves fails to teach the articles being lottery tickets and providing the machine with a message display advertising the articles.

The specific articles being lottery tickets in considered an obvious matter of choice and the provision of advertising displays on a vending machine is notoriously well known in the art.

  
Serial No. 912005

-4-

Art Unit 311

Groves fails to teach the display means being windows past which the articles are transported to be viewed while dispensing. Groves further fails to teach separating means for separating the articles from one another.

Knee '935 teaches display means comprising a window allowing for viewing of the articles and their movement for dispensing. Knee '935 also teaches providing separating means comprising bursting means 51, 54, 65 to insure positive separation of articles from one another.

It would have been obvious to one of ordinary skill in the art to employ windows to view the articles as the display means in Groves and to provide separating means in Groves to insure positive separation of the articles from one another for dispensing.

5. Claim 21 is rejected under 35 U.S.C. § 103 as being unpatentable over Groves in view of Knee '935 as applied to claims 1, 2, 4-6, 10, 16, 18 and 22 above, and further in view of Cedrone et al.

Groves in view of Knee '935 fails to teach providing a plurality of vending machines and communicating data regarding operation to a central location.

Cedrone et al teaches providing a group of vending machines and communicating data regarding operation of the

Serial No. 912005

-5-

Art Unit 311

machine to a central location.

It would have been obvious to one of ordinary skill in the art to provide plural machines of Groves-Knee '935 and communicate data regarding their operation to a central location in view of the teaching of Cedrone et al.

6. Claims 11, 12, 29, 30, 32, 38-40, 43-45 and 47 are allowable over the prior art of record.

7. The failure of the Examiner to apply prior art to claims 31 and 33 should <sup>not</sup> be construed as an indication of allowability as the Examiner is unable to fully ascertain the scope of these claims in view of the above rejection under 35 USC 112.

8. The preliminary amendments filed 10 July 1992 have been received and placed of record.

9. Any inquiry concerning this communication should be directed to Examiner David Bollinger at telephone number (703) 308-1113.
